Market and uses: Business, Educational, Recreational & Fun Device

THE V.V.T. Read & Writer OFFERS users the option of using this device to not only read books, But opens a new market called "Story telling." Using the V.V.T. State of the art Al stathmic and human harmonic reproduction, you can set your own Character Voices and tell stories to Friends, simply by upload the file onto on to the Internet & blog or an email. As a business tool, you can use this device to read your emails as you multi task and do other things. Haven't seen Wifey in a while do to your busy schedule, just set your human voice to "my Body" and ~~hear~~ hear her read your email at the job.

THE new market called "Story telling" on E-books. Hear great novels in playback mode, as many writers add V.V.T. Voices to their e-books to hear their stories in V.V.T. Characterization mode. As a teaching aid, read books in school or have it read to students in Full mode, as they learn to read by seeing words being told, with a dictionary thesurus, so they understand every word they hear.

Even more, Full color pictures and image support on the Multi Screen mode. Words are seen as in a E-reader tablet, as Full color and even motion images are seen in Full color. Stratomatic Compatible Device Imagery.

Limited V.V.T. Reader & Writer Apps, available on Selected Smart phones, allowing tele-conference transmission, using state of the art V.V.T. The Future of education, communications and the sales of
