

For Fair trade rationalization
 THE Blue Dough must
 Subsidized Trade and therefore
 never can we go in debt or need
 to borrow from any nation. #4

Currency:

THE Blue Dough # This removes the
 Vatican out of the Square # (S = Square
 = Vatican.) # # = Square Z = Zulu.
 The Zulu is now the districts and not
 the Roman Catholic Church.
 # = Dough = Blue Dough = Zews Currency

A to Z is our alphabets First and last
 letters. A = Beginning Z = End

Currency is counted from right to
 left. It begins with a percentage of
 dough, we use the term Cent, meaning
 percent. 25% of 1 dough or

25% of \$1.00 = 25A

whereby A = Aaa = The beginning

Z = Zulu = the end. And we start
 with Fractions or percentage and the
 term Cents remains

25 = 25 doughs = 25A = 25 cents

Therefore once the terminology is
understood, our children should by
 the nature of economics, understand
Fractions before whole numbers. IF

you took a trip to Germany and said
 here son is \$1 go get some candy,
 (You is nuts) At 5 to 1 EU? Come on!

But to say "Here's a quarter (25A)" that's
enough talk. God-Is-Real - The most
Wealthy nation.
