"Introducing MIS"

New From Microsoft (Microsoft Integrated Systems) A User Friendly DAW/V.V.T

Software integration environment, whereby several software designers applications all function under one (single) application extension. (MIS).

Whereby VST, REX2, ReWire, Rack Extensions by Propellerhead and many product lines function all on a single security Dongle key. Using F-1 thru F-12 creating several explorer windows on the powerful P.C. Studio and by reducing redundant apps giving Producers and artists alike unlimited
